**County item
reported missing**

An employee of the Lake County Department of Utilities recently reported that a \$3,000 Trimble Pathfinder GPS unit went missing after he performed work on Poplar Drive in Willoughby.

The man said he had been on a job site Thursday between 9:30 and 11:30 a.m. He told police he realized about two hours later that he left the device on the lawn. But when he returned, it was gone.

The unit was stored in a black nylon satchel. It has been serialized and entered in the national database as stolen, Willoughby Detective Lt. Tom Trem said.
